DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kishi et al (U.S. Patent No 5,987,635).

With respect to claim 15, figure 4 of Kishi et al discloses a memory device comprising a control circuit (15) for generating controls signals (36, 37, 38) for operating the semiconductor chip (22) and a test control circuit (16, 17, 18) being operative in a test mode (when signal at 32 is applied at 18) for inhibiting output of the control signals. See column 8, lines 1-20.

With respect to claim, the terminal TM would be considered as a test starting terminal because this terminal receives a test starting signal.

Allowable Subject Matter

Claims 1-14 are allowed.

Claims 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: ***

The prior art of record fail to teach or suggest a memory device comprising a first chip and a second chip. The first chip having a control circuit for generating control signals for operating the second chip and a test control circuit for inhibiting the control signals from being transmitted to the second chip while the first chip is tested (claims 1 and 11); a circuit for setting the output node of control signals in a high impedance state (claim 17), and a level fixing circuit as claimed in claims 18 and 19.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- -Makabe et al disclose a memory device having a test circuit.
- -Haraguchi et al disclose a memory device including a test circuit

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Son Dinh whose telephone number is 571-272-1868.

The examiner can normally be reached on 8am-5pm.

Art Unit: 2824

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on 571-172-1869. The fax phone number for the organization where this application or proceeding is assigned is 571-273-1868.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
